

U. S. DEPARTMENT OF ENERGY
ENVIRONMENTAL MANAGEMENT SITE-SPECIFIC ADVISORY BOARD (EM SSAB)
Idaho National Laboratory Site Environmental Management Citizens Advisory Board

MEMBERSHIP APPLICATION

The EM SSAB provides meaningful opportunity for collaborative dialogue among the diverse communities at EM clean-up sites and the Department of Energy (DOE). At the request of the Assistant Secretary or the Site Manager/Assistant Manager for Environmental Management, the Board provides advice and recommendations concerning the following EM site-specific issues: clean-up standards and environmental restoration; waste management and disposition; stabilization and disposition of non-stockpile nuclear materials; excess facilities; future land use and long-term stewardship; risk assessment and management; and clean-up science and technology activities.

Currently, the EM SSAB comprises eight local boards, which are located near DOE sites across the country: Hanford, Idaho, Nevada, Northern New Mexico, Oak Ridge, Paducah, Portsmouth, and Savannah River. If appointed, you will be serving on the **Idaho National Laboratory Site Environmental Management Citizens Advisory Board**.

Members appointed by DOE to serve on the EM SSAB are subject to conflict of interest principles in order to maintain the integrity of the EM SSAB's work. These principles address financial conflict of interests and the use of members' positions for private gain for themselves or others. Upon appointment, members are provided with details regarding the specific conflict of interest principles.

Please note: U.S. federal government employees are ineligible to serve on the EM SSAB.

If you would like to be considered for membership on the EM SSAB, please complete pages 2 - 4 of this application and forward it and your resume, if available, to the contact for your local EM SSAB listed on page 4. For more information on the EM SSAB, visit <http://www.em.doe.gov/Pages/ssab.aspx> or the Web site for your local board, www.inlemcab.org.
