The EM SSAB provides meaningful opportunity for collaborative dialogue among the diverse multicultural communities at EM cleanup sites and the Department of Energy (DOE). At the request of the Assistant Secretary for Environmental Management or the Field Managers, the Board provides advice and recommendations concerning the following EM site-specific issues: cleanup standards and environmental restoration; waste management and disposition; stabilization and disposition of non-stockpile nuclear materials; excess facilities; future land use and long-term stewardship; risk assessment and management; and cleanup science and technology activities.

Members selected to serve on the EM SSAB are subject to conflict of interest principles in order to maintain the integrity of the EM SSAB's work. These principles address financial conflict of interests, the use of members' positions for private gain for themselves or others, and the appropriate use of non-public information. Upon appointment, members are provided with details regarding the specific conflict of interest principles.

If you would like to be considered for membership on the EM SSAB, please complete pages 1-3 of this application and return completed application to the person indicated on page 4. For more information on EM SSAB, visit <http://www.em.doe.gov/Pages/AdvisoryBoards.aspx> or <http://www.inlemcab.org>.
